Complete Solution For Companies

What we do

We provide a solution to business companies who has employees but not able to monitor everyone. It's very difficult today's to monitor every staff a company, their task and their attendance. But now it's possible.

Techgrid has introduced a cost effective way to manage all the things. We are service based company so you don't have to worry about to manage anything. We manage, you use.

Brief intro about our solution:

1. Owner page :

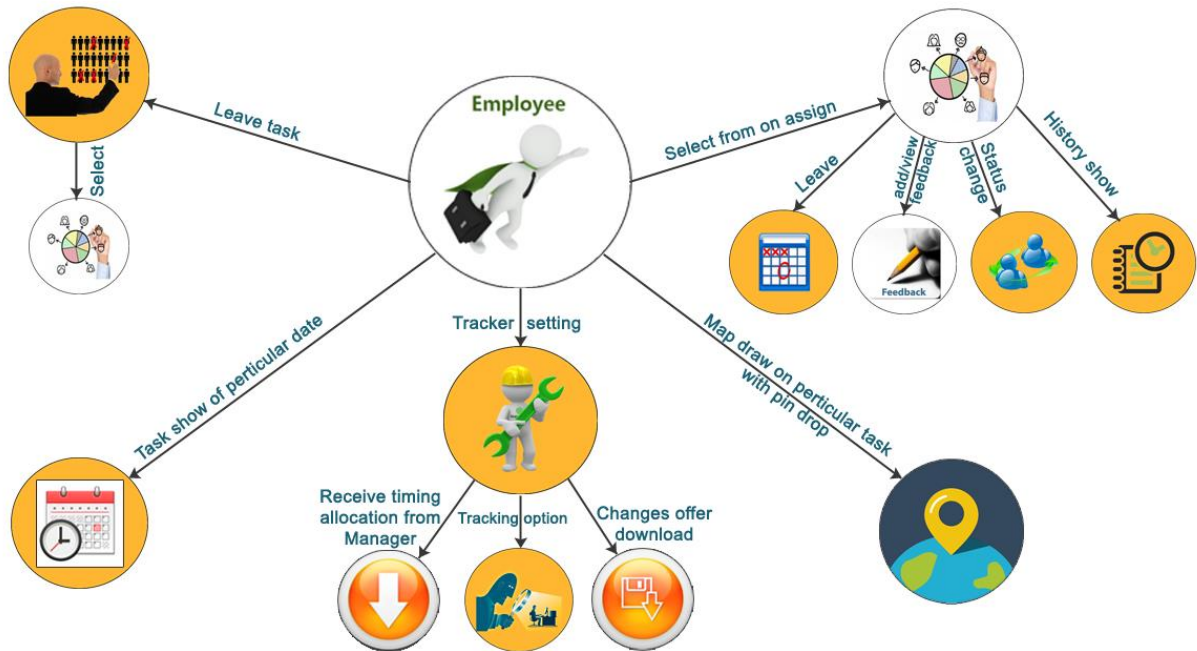

- a. Will add distributor under it if any else add staff.
- b. Send notification any time to any employee/distributor.
- c. Create task for each staff which staff have to complete today (Extra fields like location where they have to go, at what time etc.)
- d. Track employee with his current location with nearby address and time.
- e. Complete attendance management smartly of staff. Now you pay accordingly to their presence in office.
- f. If there is distributors of your own than distributors will add their staff and they can only able to track & manage their staff not of other but owner can manage and track all.
- g. Automatically manage when employees leaves office and when it come back to office with time.
- h. Leave management of staff and allow disallow leave depends on authorized person.
- i. 3 months of complete history of tracking.

- j. Manage all contacts of office on single app now you don't have to ask any please give me number to any of. Which number should visible to dealer is also settable with calling feature by owner.
- k. Complete report management with admin panel web view and take print out of report.
- l. Set time for tracking of staff according this the tracking of staff will stay awake.

2. Staff page :

- a. Login by staff in morning by this automatically attendance will make with time and location of login place.
- b. Logout by staff will set out time with location. Owner can view the location of staff on attendance page with location and time of all staff.
- c. Send leave to owner (approved by owner).
- d. Staff will see all task scheduled by owner for him with details, time & location (it will automatically open in map where he have to now no excuses by staff I did not got address or any) and then time of reaching the place and leaving that place & will mark as a complete, pending or failed accordingly with comment.
- e. Able to see all contacts with calling button of his coworkers and his supervisor.
- f. Send notification to owner.

GPS Employee Tracker

How we do

We have developed the app for this complete solution with no hardware or any other cost. You concentrate on your business and let's left on us. Our mobile app is full proof solution in itself. Staff can't deny he does not remembered to on GPS and ping will popup automatically about switch on NET & GPS if it is off.
